EXDCI @ ORAP

March, 17 2016

The EXDCI project has received funding from the European Union Horizon 2020 research and innovation programmed under grant agreement No 671558.

- Addressing the shortage of HPC skills in academia and industry, by:
  - Promoting HPC and HPC skills to young people as exciting and rewarding areas for study and employment;
  - Supporting employers in job specification and recruitment of staff with appropriate HPC skills;
  - Undertaking training gap analysis across the whole HPC Ecosystem, with a view to producing a synthesised training roadmap for Europe;
  - Supporting the development of a community of HPC training providers.

- Supporting Talent Generation
  - To promote the importance of HPC skills to young people.
  - Creating material to present at eg local science festivals, university visits, etc:
    - To present HPC in a gender-neutral way, to try to improve the gender balance within the HPC community;
    - To highlight the many and varied jobs that exist, both in HPC community and professions combining modelling skills with domain expertise, eg engineering, climate modelling.
  - Initial set of 5 HPC career case studies produced; more to follow
    - <http://www.exdci.eu/CaseStudies/>

- Facilitating HPC Staff Recruitment
  - “Job Centre” portal to be set up, providing:
    - Sample job descriptions (to help employers specify the skills they need);
    - Links to sites where HPC jobs are listed;

  - Analysing the activities of the European projects (mainly the ones from the FET HPC 1 call) and other HPC Ecosystems actions with an objective to identify the areas of:
    - (1) technology provision,
    - (2) infrastructure and
    - (3) application resources that can benefit from international collaboration.
- Federating the international contacts to prevent each project from having to develop its own network.
- Identifying tools suitable for fostering such relationships

# Impact monitoring – Methods and tools

EXDCI @ ORAP

March, 17 2016

- Create the necessary analysis tools to support informed decision-making in relation to:
